Data Analytics Essentials

PROFILE INFO

Dedicated data analyst with a strong foundation in SQL, Excel, and Power BI, and a deep passion for data-driven insights. Seeking a data analyst position to apply my analytical prowess, problem-solving skill, and unwavering attention to detail.

PROJECTS

Database Design and Implementation

Final Project | Harvard University, Cambridge Massachusetts

- Developed a rigorous design document detailing the database's purpose, structure, and operations.
- Constructed an entity relationship diagram for clear database visualization.
- Ensured the schema maintained database integrity and efficiency.
- Provided comprehensive SQL queries for user data manipulation.

Dynamic Dashboards for Insightful KPIs

Job Simulation | PwC, Switzerland

- Strengthened Power BI skills through a job simulation, improving understanding of client data visualization needs.
- Demonstrated expertise in creating impactful Power BI dashboards conveying KPIs, adeptly addressing client requests.
- Exhibited strong communication skills in concise, informative email correspondence with engagement partners, delivering valuable insights.
- Leveraged analytical problem-solving to identify root causes for challenges at the executive level, showcasing a commitment to data-driven decision-making.

EDUCATION

- Bachelor of Science in Civil Engineering
Ateneo de Davao University, Philippines
2010 - 2016
